TECHNOLOGIES AND TOOLS

- Java
- JavaScript
- Python
- MySQL
- Bootstrap
- jQuery
- HTML
- CSS
- React.js
- JSP
- Express
- Mongo DB

APTITUDES

- Empathy
- High responsibility level
- Analysis capacity

Programming technician
with experience in web development

OBJECTIVE

Use my knowledge to help people solve tasks and automate common activities to make the world more efficient, with less human error. Also constantly improve myself solving real problems and above all learning.

EDUCATION

National Polytechnic Institute	
Programming Technician	2018 - 2021
National Polytechnic Institute	
Artificial intelligence engineering	2022 - Present

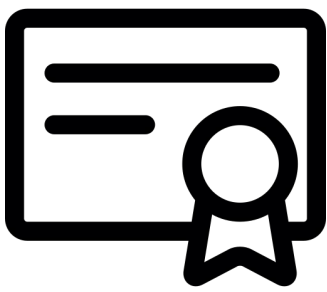

EXPERIENCE

DeepTure • Software engineer

I participated in the development, design, and implementation of functions for web systems, always keeping in mind the standards and good practices for the scalability of the system.

Tasks involving this role

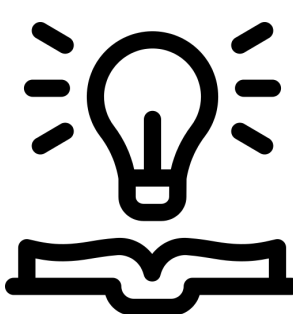

- Configure the server to start the development of a web system with express and node.js
- Design database based on the needs of the system and documentation
- Configure stored functions, triggers, and tables in MySQL
- System interface design with Adobe XD
- Data graphs displayed with morris.js
- Implementation of account recovery emails
- System mockup using html and CSS with the help of bootstrap, system with responsive interface
- Implementation of an information exchange system between user-server-user powered by Socket.io
- Implementation of AJAX requests to improve the user experience powered by jQuery
- Token deployment for secure logins with JWT
- Development of a desktop application to complement the system with java as a language

CERTIFICATIONS

Web development I	Apr 2020
Web development II	Apr 2020
Cybersecurity in teleworking	Jun 2021
Digital Marketing Fundamentals	Jul 2021
