SOFT SKILLS

- Assertive communication
- Adaptability
- Stress management
- Team work

EDUCATION

- **Artificial Intelligence Engineering**

  National Polytechnic Institute
  2021-2025

- **Programming Technician**

  National Polytechnic Institute
  2018-2021

ABOUT ME

I am an artificial intelligence engineer in training with experience in web development, asynchronous programming, and cloud architectures. Specialized in machine learning, neural architecture search (NAS), and bio-inspired algorithms. I have worked on the design of interactive applications, database management (relational and non-relational), and cybersecurity. I'm passionate about automation and the research of AI models.

WORK EXPERIENCE

Web developer

Alianza de Donatarias en Adicciones
2022-2024

Development of web application for organizational communication. I participated from the requirements gathering to the deployment and maintenance

- Talk to the user
- Configure the server
- Design relational database
- System interface design with Figma
- API creation and testing
- Views layout
- implementation of cloud services (S3)
- Cloud deployment

Web development team leader

Rombo Works
ene 2024 - oct 2024

Leader in development, implementation and planning of modules with web technology. Integration of new technologies, development of APIs, planning of activities, documentation, implementation of non-relational databases, implementation of artificial intelligence language models.
